Desktop Spaces • Macros to Improve Navigation and Window Management, v4.0

> Note: **Version 4.0** installs the macros in a group named :**sys Desktop Spaces**. This has been the case since **Version 3.0**; older versions installed in groups that started with a dot (.)

Installation

1. Before installing this version of the macros, optionally export older versions of these macros. After the optional export, **be sure to delete the old versions within the Keyboard Maestro editor**. Older versions could be located in any of the following macro groups (or, of course, a group that you previously renamed):
   - :**sys Desktop Spaces**
   - .**sys Desktop Spaces**
   - .**sys Desktops**
   - .**sys Spaces**

2. Double-click **Desktop Spaces Macros.kmmacros** to install the 62 Keyboard Maestro macros in this file. Note that the macros will installed in the :**sys Desktop Spaces** group.

3. Right-click on the :**sys Desktop Spaces** group and select **Enable Macro Group**.
